EXECUTIVE SUMMARY

MCA graduate with hands-on experience building real-world Django applications, including a role-based complaint management system with workflow tracking and analytics. Built and deployed a real-world Pet Care Management System with features including user authentication, appointment booking, payment integration, invoice generation (PDF), and an admin dashboard with analytics. Strong understanding of OOP, SDLC, and Agile principles. Seeking entry-level roles as a Software Developer, Full Stack Developer, or IT Support Engineer.

EDUCATION

MCA – Master of Computer Applications **2024 – 2026**

Asan Institute of Management, Chennai, India | CGPA: 8.3

B.Com (CA) – Bachelor of Commerce with Computer Applications **2021 – 2024**

Asan Memorial College of Arts and Science, Chennai, India | CGPA: 8.1

SKILLS

Soft Skills:

Leadership | Adaptability | Teamwork | Problem Solving | Consistency and Continuous Learning

Technical Skills:

Languages: Python

Frameworks: Django (MVT, ORM, Authentication, Admin Panel, REST-style views)

Databases: MySQL, SQLite — Schema design, CRUD operations, Query optimization

Web Technologies: HTML5, CSS3, JavaScript, Bootstrap, Responsive Design

Tools:

Excel (Pivot Tables, VLOOKUP), Git, VS Code, Chart.js

Concepts:

OOP, SDLC, Agile, CRUD Operations, Role-based Authentication, REST API Basics, Database Design

PROJECTS

1. CMS Pro – Complaint Management System **Jan 2026 – Apr 2026**

Technologies: Django, Python, HTML5, CSS3, JavaScript, Bootstrap, SQLite,Chart.js

- Built enterprise-grade complaint management system with 3-tier role architecture (Admin, Manager, User) and role-based access control
- Implemented complaint lifecycle workflow (Open → In Progress → Resolved) with activity timeline, ticket IDs, and timestamped remarks
- Developed admin analytics dashboard using Chart.js showing complaint distribution by category (bar chart) and status breakdown (doughnut chart)
- Integrated Django email notifications on status changes; structured 10+ views across 3 role-specific flows with responsive dark-themed premium UI

2. VetSphere – Pet Care Management System **Dec 2025 – Mar 2026**

Technologies: Django, Python, HTML5, CSS3, JavaScript, Bootstrap, SQLite

- Built a full-stack web application to manage pet records, appointments, and billing across 5 modules for 50+ simulated records
- Implemented role-based user authentication and admin dashboard using Django's built-in auth system for secure access
- Designed normalized relational database schema with 8+ models; optimized ORM queries reducing response time by ~30%
- Integrated automated email delivery to send dynamic PDF invoices to users upon appointment confirmation using Python libraries
- Built fully responsive UI using Bootstrap ensuring consistent experience across devices

CERTIFICATIONS

- React.js Development – Tech Force Institute
- Employability Enhancement Skills – ACME Academy

HOBBIES

- Developing real-world web applications with focus on backend systems
- Practicing data analysis using SQL and Python to derive insights
- Continuously improving problem-solving and logical thinking skills
- Exploring efficient system design and workflow optimization
